OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire growth during the first 3 burning periods was heavily influenced by numerous spot fires with wind driven influences pushing fire downhill at critical rates of spread. Yesterday there was minimal activity with some heavy down fuels smoldering in the east and north aspect areas. The fuels in these areas are heavier brush and larger trees with minimal light flashy fuels. While there is a ladder component the activity yesterday did not generate enough heat or fire to extend into the canopy.

All fuels are having an adverse drought response with higher levels of torching and ignition receptivity, with many areas having complete consumption. ERC Values at proximal weather stations are showing near or at max levels (97%).

Fire Behavior for Optimal Alignment Receptive Fuels

Fuel Type	ROS (Ft-MIN) Forward	ROS (Ft-MIN) Lateral	FL (Ft)	P(i)G
Grass Model	Slow (50-70)	Slow (8-10)	2 - 6	100%
Shrub Model	Slow (35-50)	Slow (4-8)	5 - 15	100%

SPECIFIC:

Fuels are extremely receptive to new fire starts. While the ROS and FL will support direct attack, the main concern is an established fire creating numerous spot fires which would quickly transition from slow to rapid ROS and much higher levels of Fire Behavior.

Post fire hazards will be increasing as aggressive suppression efforts have weakened an already drought stressed environment. Trees are weakened and prone to falling without warning.

Branch I

Smoldering heavy down fuels or isolated sleepers in sheltered areas with duff or leaf drop.

Branch II

This area of the fire has seen the most recent activity. Yesterday there were some heavy fuels that were still burning with low intensity near the fire line. Crews should expect to find some sleepers and possible heavy down fuels or stump holes still putting out heat.

AIR OPERATIONS:

No expected limitations

SAFETY

Maintain situational awareness as it pertains to the post fire environment, poor footing, weakened tree limbs, hot ash pits, evaluate your area continually.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern.

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

In readiness is all
